

What is Wi-Fi 6?

Wi-Fi 6 is capable of top speeds that are about 30% faster than the fastest Wi-Fi 5 speeds, and it's much better equipped to handle busy networks with lots of devices, as well as dense, crowded environments with lots of users.

Wi-Fi 6 promotes better connectivity, range, and battery life for enabled devices— even in high-density environments— while maintaining backwards compatibility to Wi-Fi 4 and Wi-Fi 5 for your older devices.

To get the most out of a Wi-Fi 6 device, you need to have a Wi-Fi 6 router to go along with it.

Check out the top Wi-Fi 6 devices of 2021:

Device Type

Device Name

Laptops

Apple M1 MacBook Air, M1 MacBook Pro
Asus Chromebook Flip c436
Dell XPS 13 (2020)
HP Spectre x360
Lenovo Yoga c940
LG Gram 17
Microsoft Surface Laptop Go

Phones

Lenovo - Legion Pro, Legion Duel
Samsung - Galaxy Fold, Galaxy Fold 2, Galaxy Note 10 series, Galaxy Note 20 series, Galaxy S10 series, Galaxy S20 series, Galaxy Z Flip 5G
Sony - Xperia 1 II
Honor - 30 Pro, 30 Pro+
Xiaomi - Black Shark 3, Black Shark 3s, Mi 10, Mi 10 Ultra, Redmi K30 Pro, Redmi K30 Ultra
Huawei - P40 series

If you don't have Wi-Fi 6-enabled devices but do have a compatible router, you can still take advantage of Wi-Fi 6 perks.
